

We are a team of industry experts who are passionate about helping small, medium and large-scale businesses achieve new heights. We offer services including custom website development, CMS development, SEO, ASO, Custom mobile app development, PostgreSQL, Django, and Python Development, among others. Since our client retention rate is very high, exceeding expectations is our gold standard. By following a holistic approach, we ensure that you get short-term quick wins as well as long-term results that don't take forever to realize.

We mix cutting-edge technologies with creativity to bring out innovative solutions for your business that can help it reach its full potential. We're not just a web development company; we're an extension of your team that integrates seamlessly with other arms of your business through custom strategies, channel expertise and flawless execution.

We develop world-class apps to scale your business

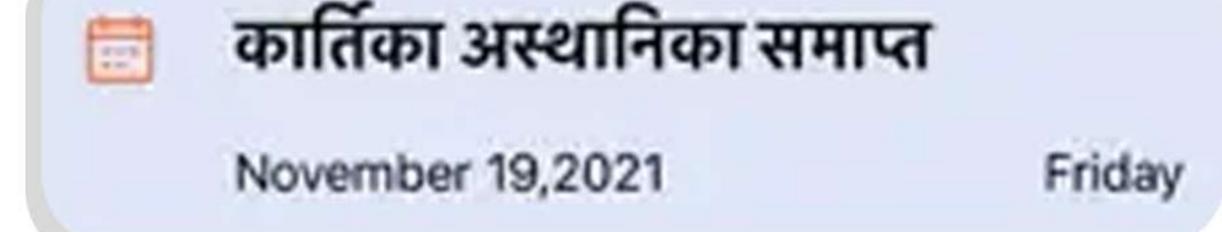

Aadinath TV

Your Best Option for Delving into Spirituality

Designed using a sophisticated tech stack this app was developed with the purpose of instilling in the youth the spiritual values of Jainism and making the process easier for the devotees to have clear access to a user-friendly interface. We prioritize ensuring the privacy of the clients so this application does not collect or share data with any third-party organization, and we have focussed on the provision of encryption of data to guarantee safe data transfer, and the user may also request the deletion of the data.

- Technology Stack: React Native, React JS, Nest JS & Node JS, MongoDB, AWS Amplify
- Primary Interfaces: Web Portal (iOS and Android)

Shariot

Traveling made easier with affordable car rental services

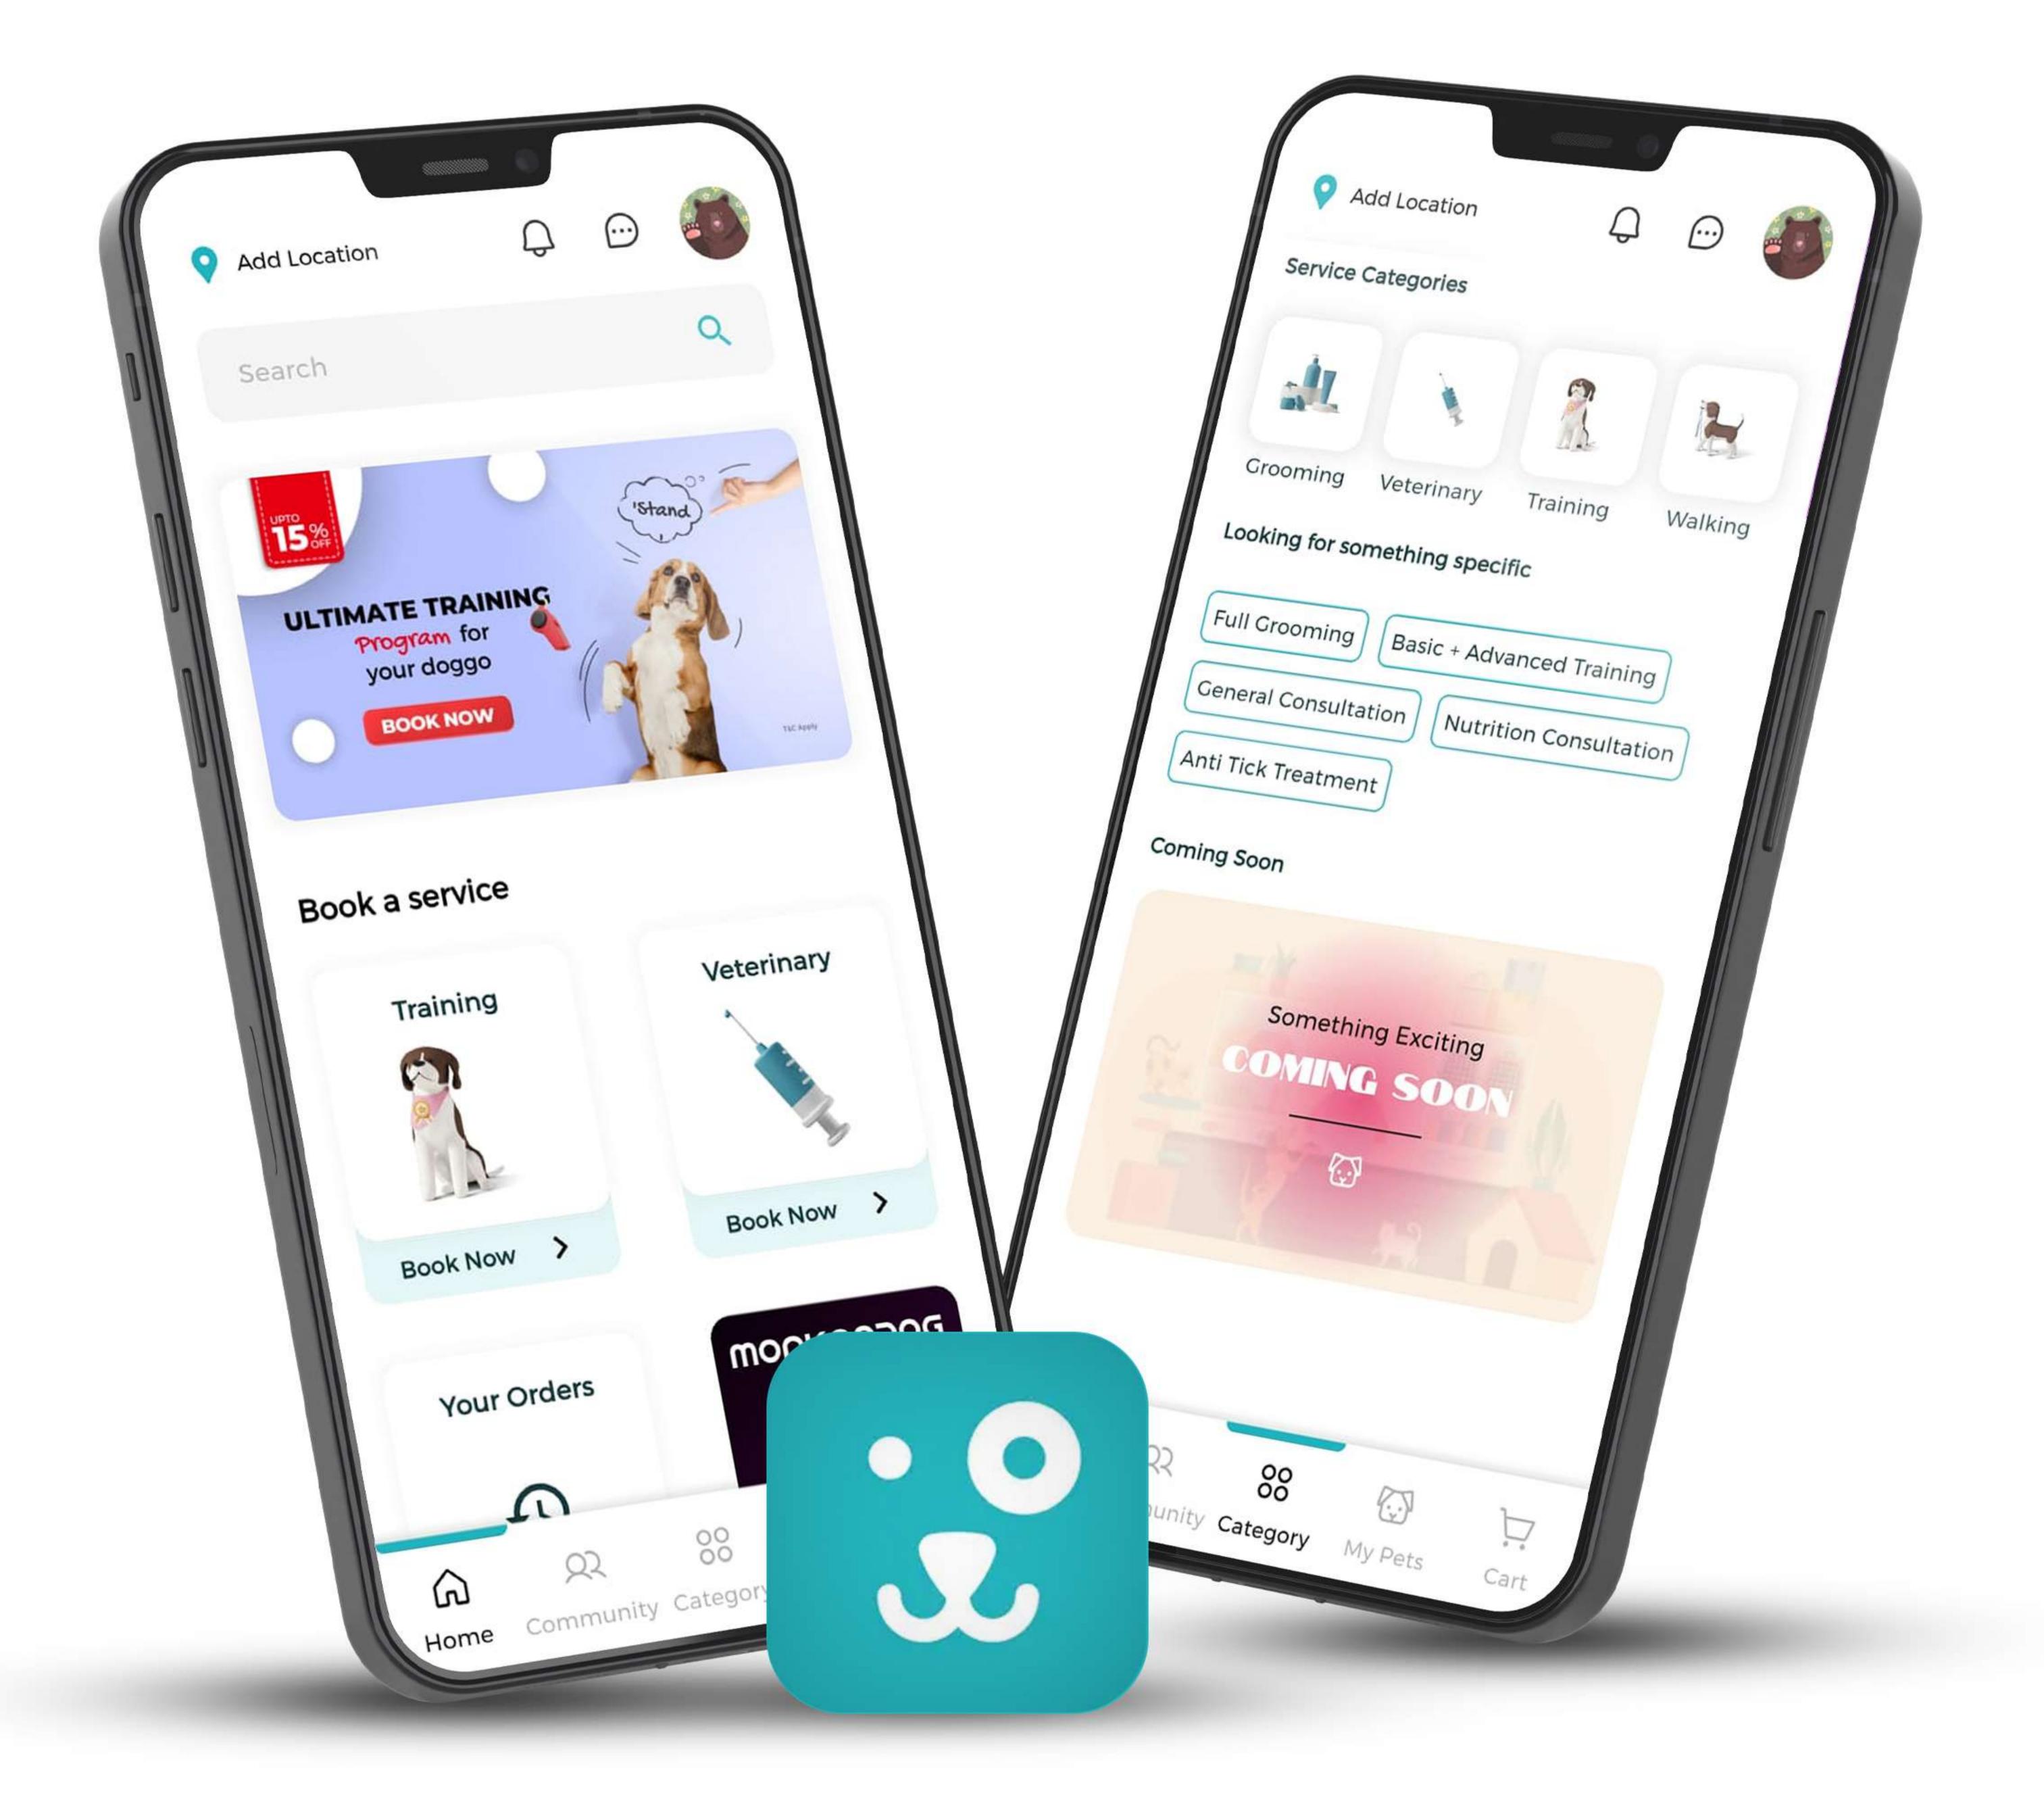

Our collaboration with Shariot, a Singapore-based car rental service that is committed to making travel easier and affordable for several users, resulted in this application. The user-friendly application depicts the locations and pricing of the trips with transparency. Thus, the simple and easy-to-navigate interface allows users to book trips with ease, extend reservations, cancel trips, and gather information about rental pricing, change of location, etc. The application keeps a record of the messages, emails, and in-app history for analytics and improving app functionality.

- Technology Stack: React Native, React JS, Nest JS & Node JS, Postgress, Docker EKS on AWS
- Primary Interfaces: Web Portal (iOS and Android)

Monkoodog

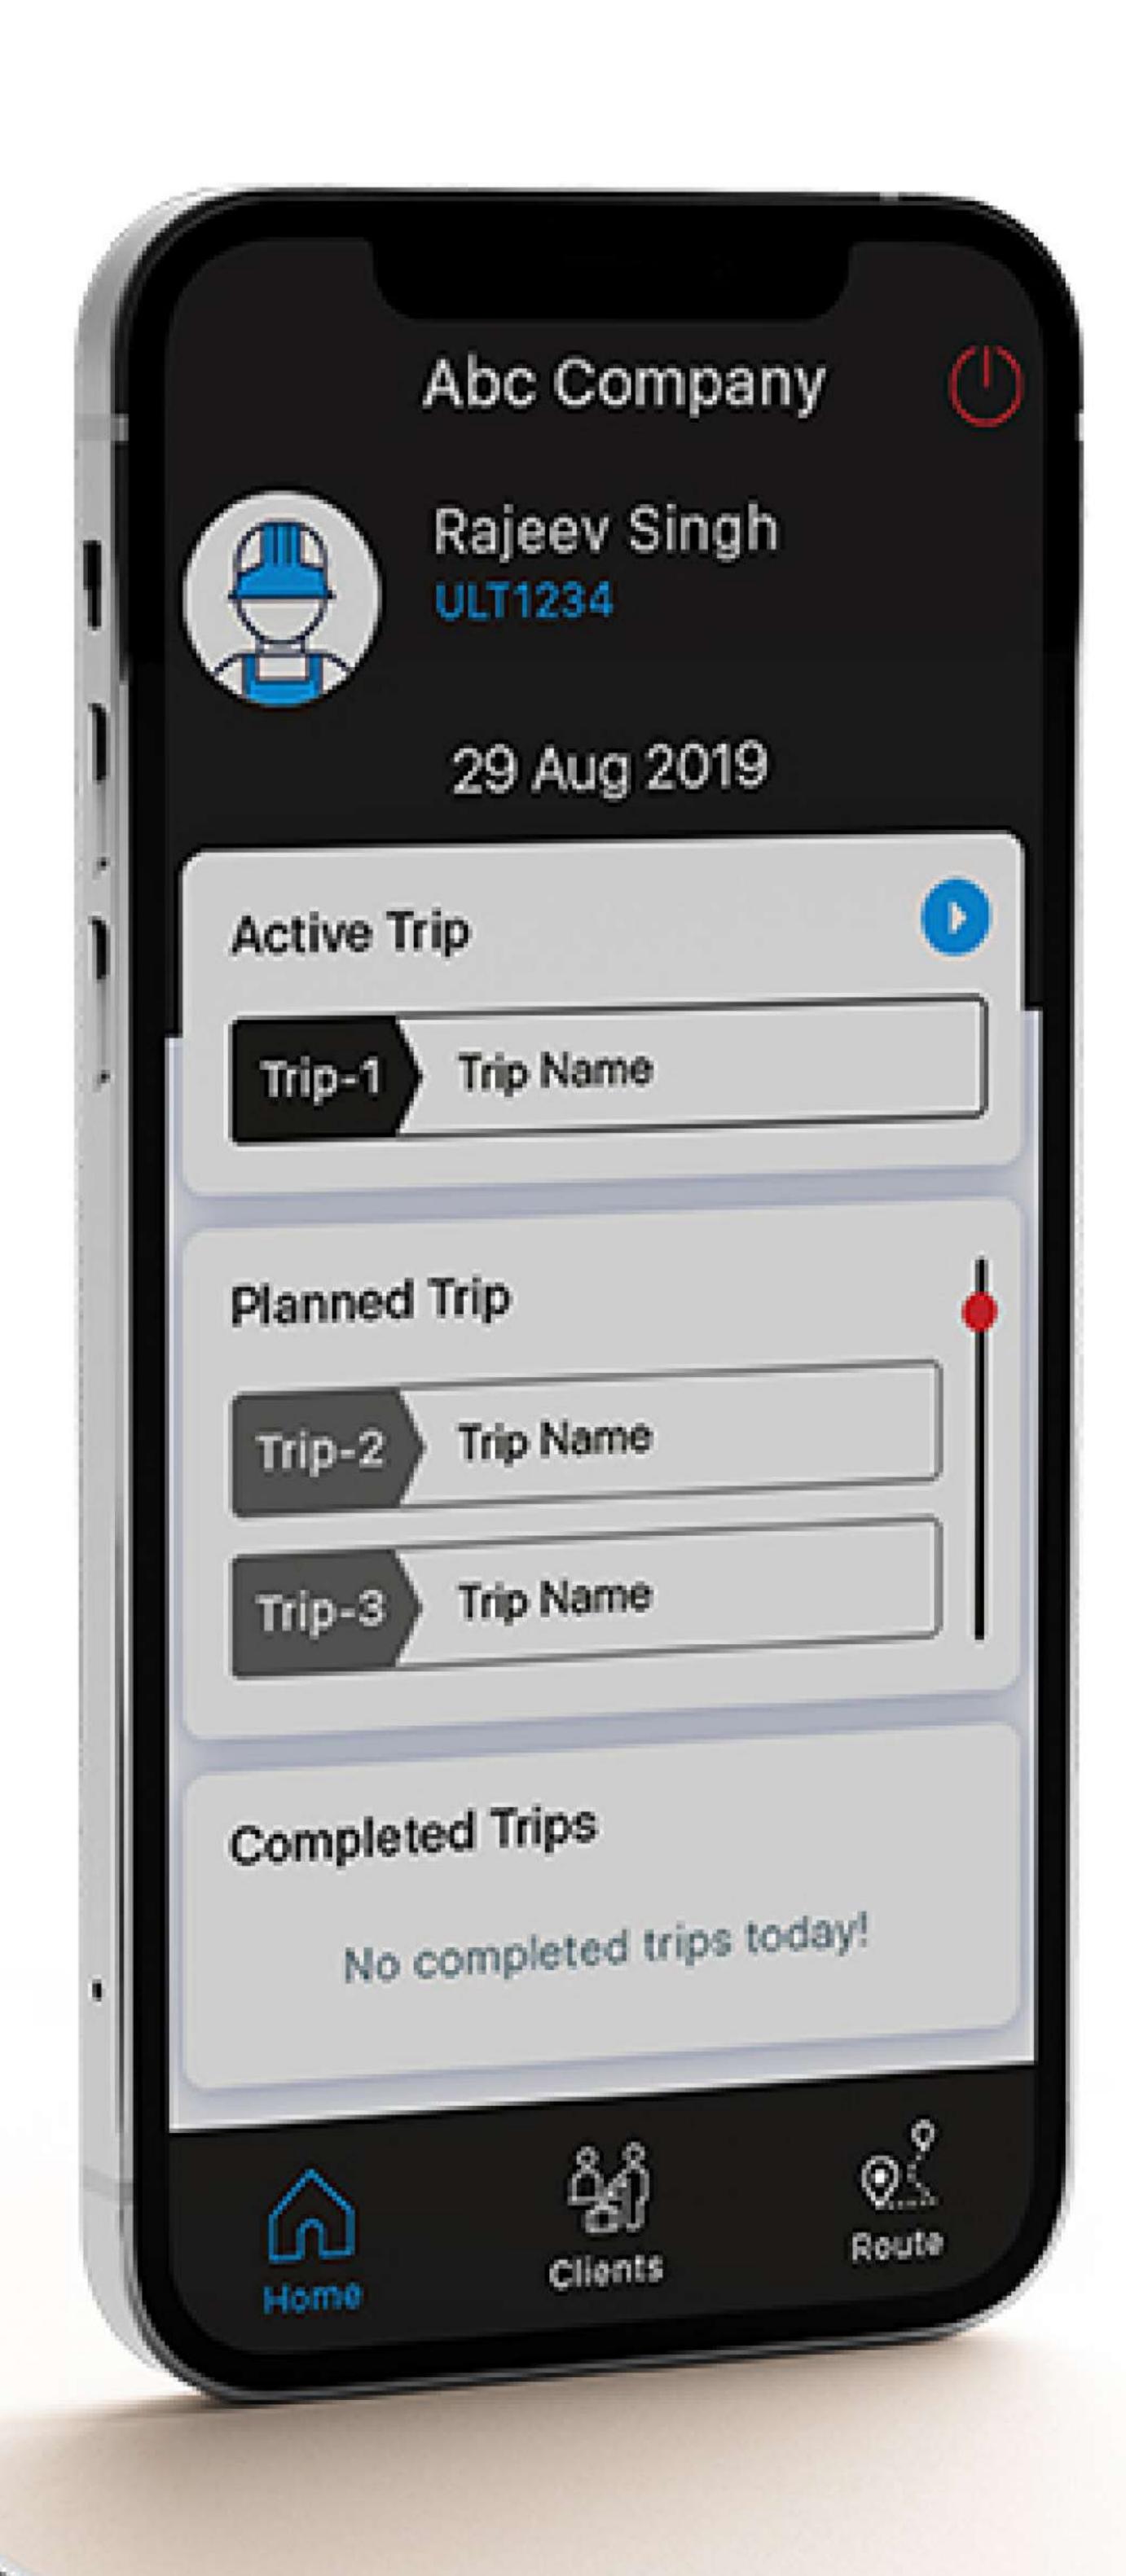

Ensuring the best services to help you in Pet Parenting

We have designed this application keeping in mind the first-time pet parents who find it difficult to figure out every aspect of grooming and vaccination of their four-legged friend. This app, designed using Flutter, is compatible with Apple devices and makes it easier for pet owners to create pet profiles and maintain the interface for setting reminders for vaccination and grooming of the pet. The app also allows setting up pages to get in touch with other pet parents and get vital information from them. Most importantly our app helps to contact the grooming service providers for their pet.

- Technology Stack: Flutter, Firebase, python and Nodejs
- Primary Interfaces: Web Portal (iOS and Android)

E-Commerce, Online Ordering

Deployed an eCommerce rental app for Ultimate's exhaustive rental business model. The app connects with several allied services via vendors associated with the custom ERP company. In addition, we incorporated features like delivery management, inventory management, route planning, tracking, and sales management.

High-Level Features:

Delivery module

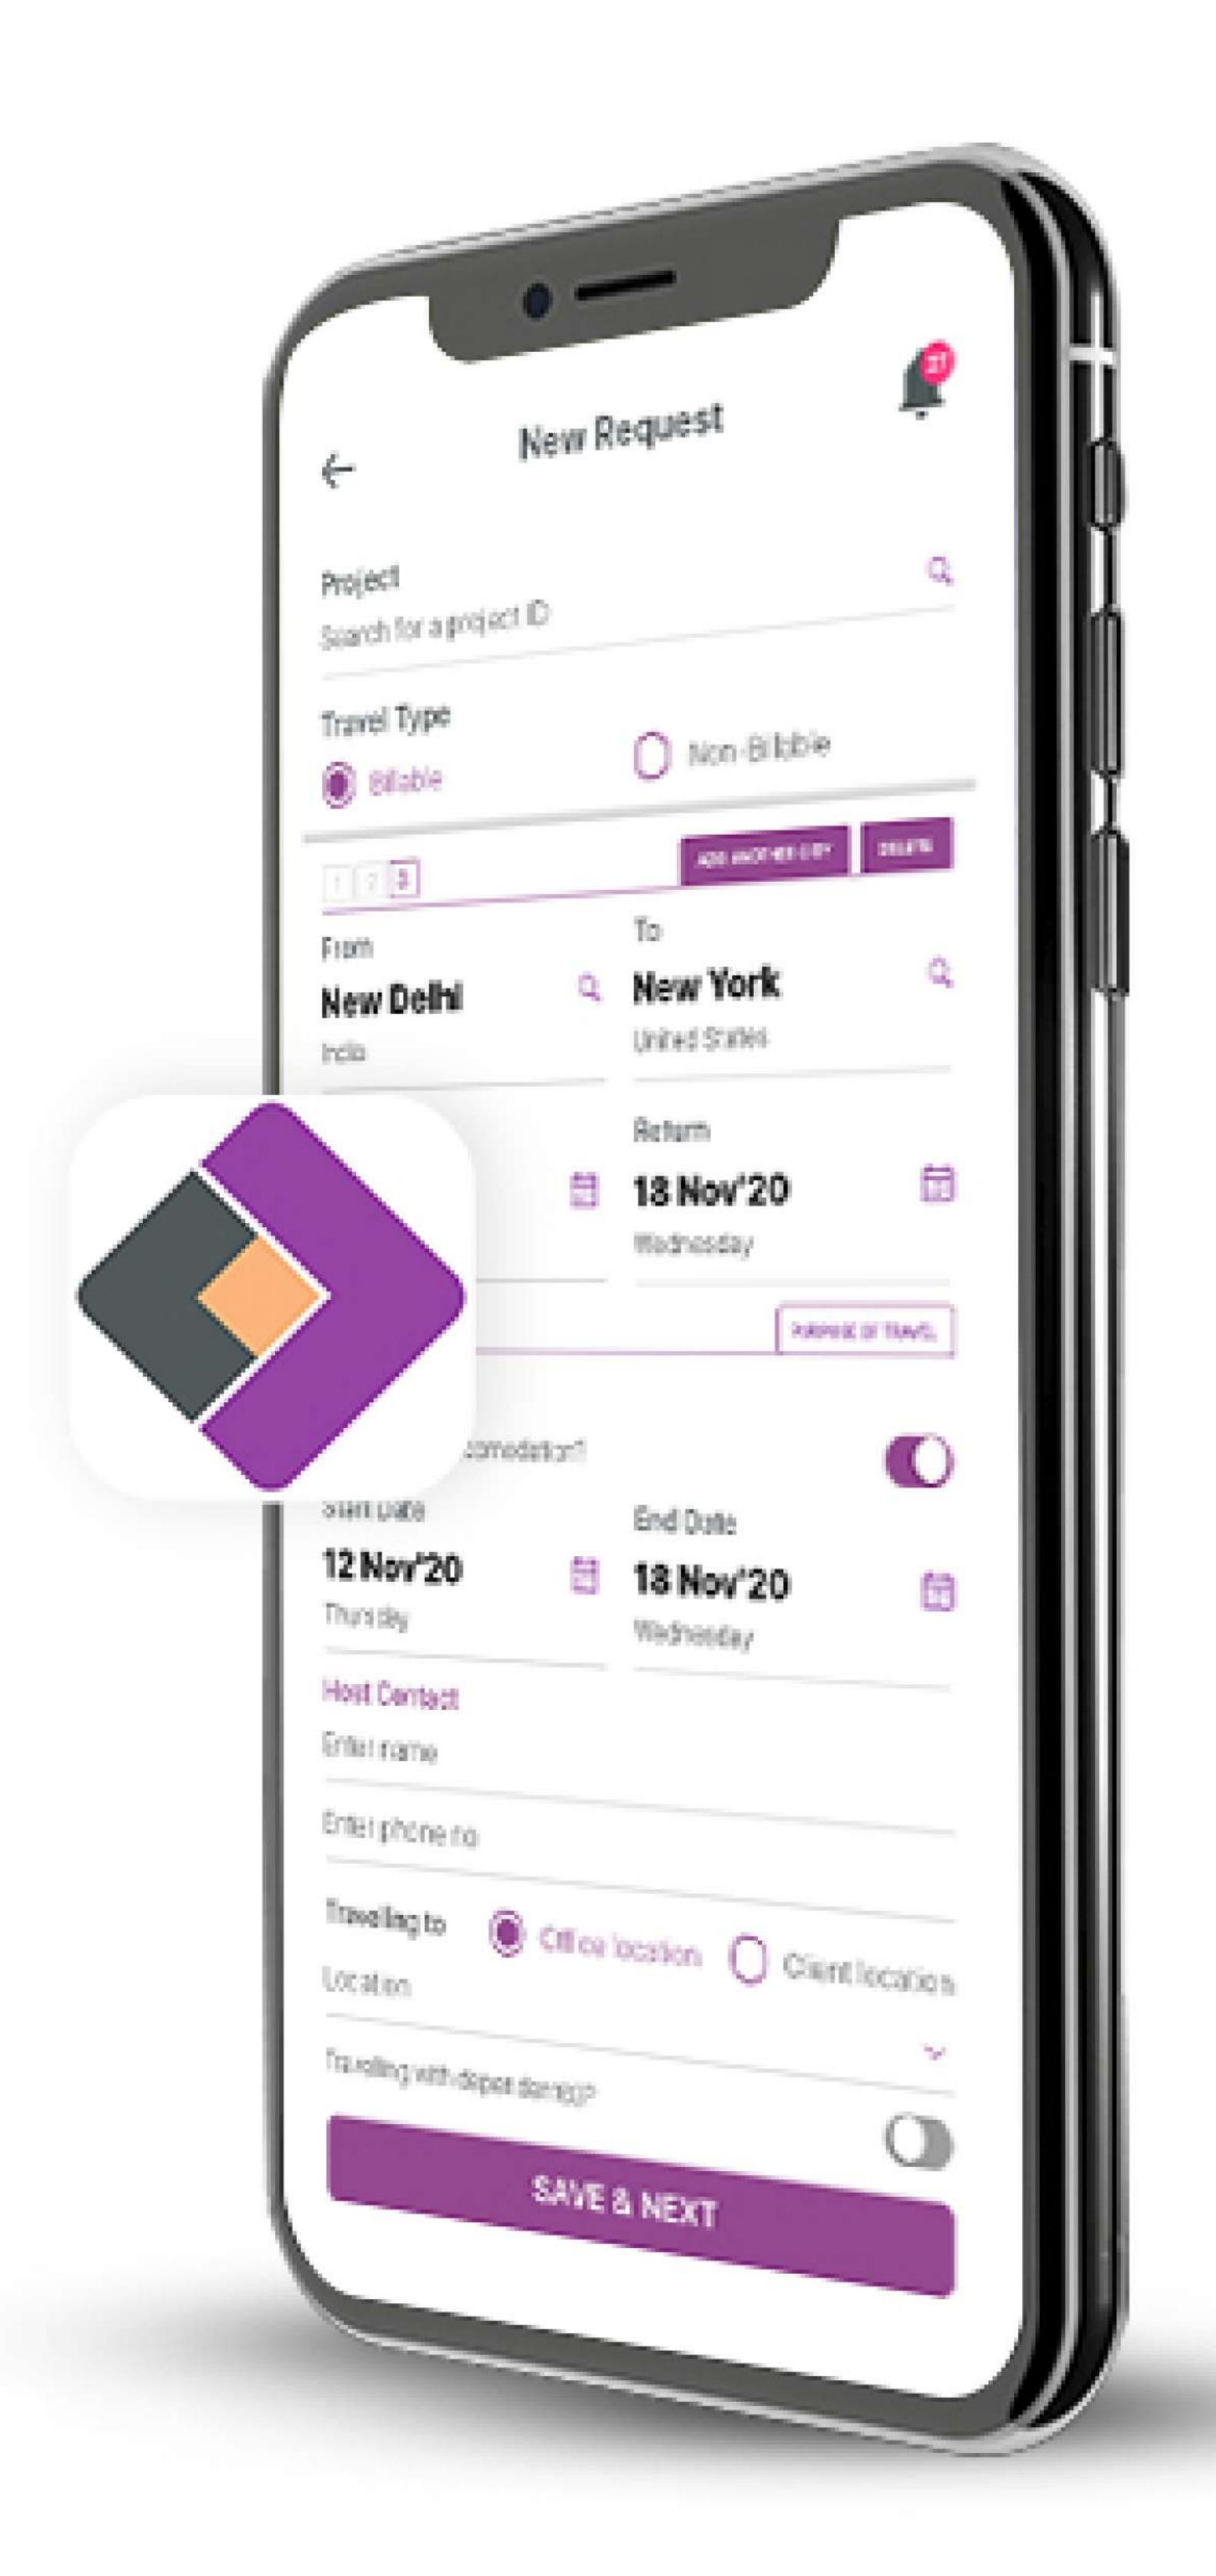

- Inventory management
- Route planning and tracking
- Sales Module
- Primary Interfaces: Web Portal, Mobile App (Android/iOS)
- Technology Stack:
- Mobile App: React Native
- Backend: PHP-Codelgniter, MySQL
- Server Environment: Cloud

Mobility SQR

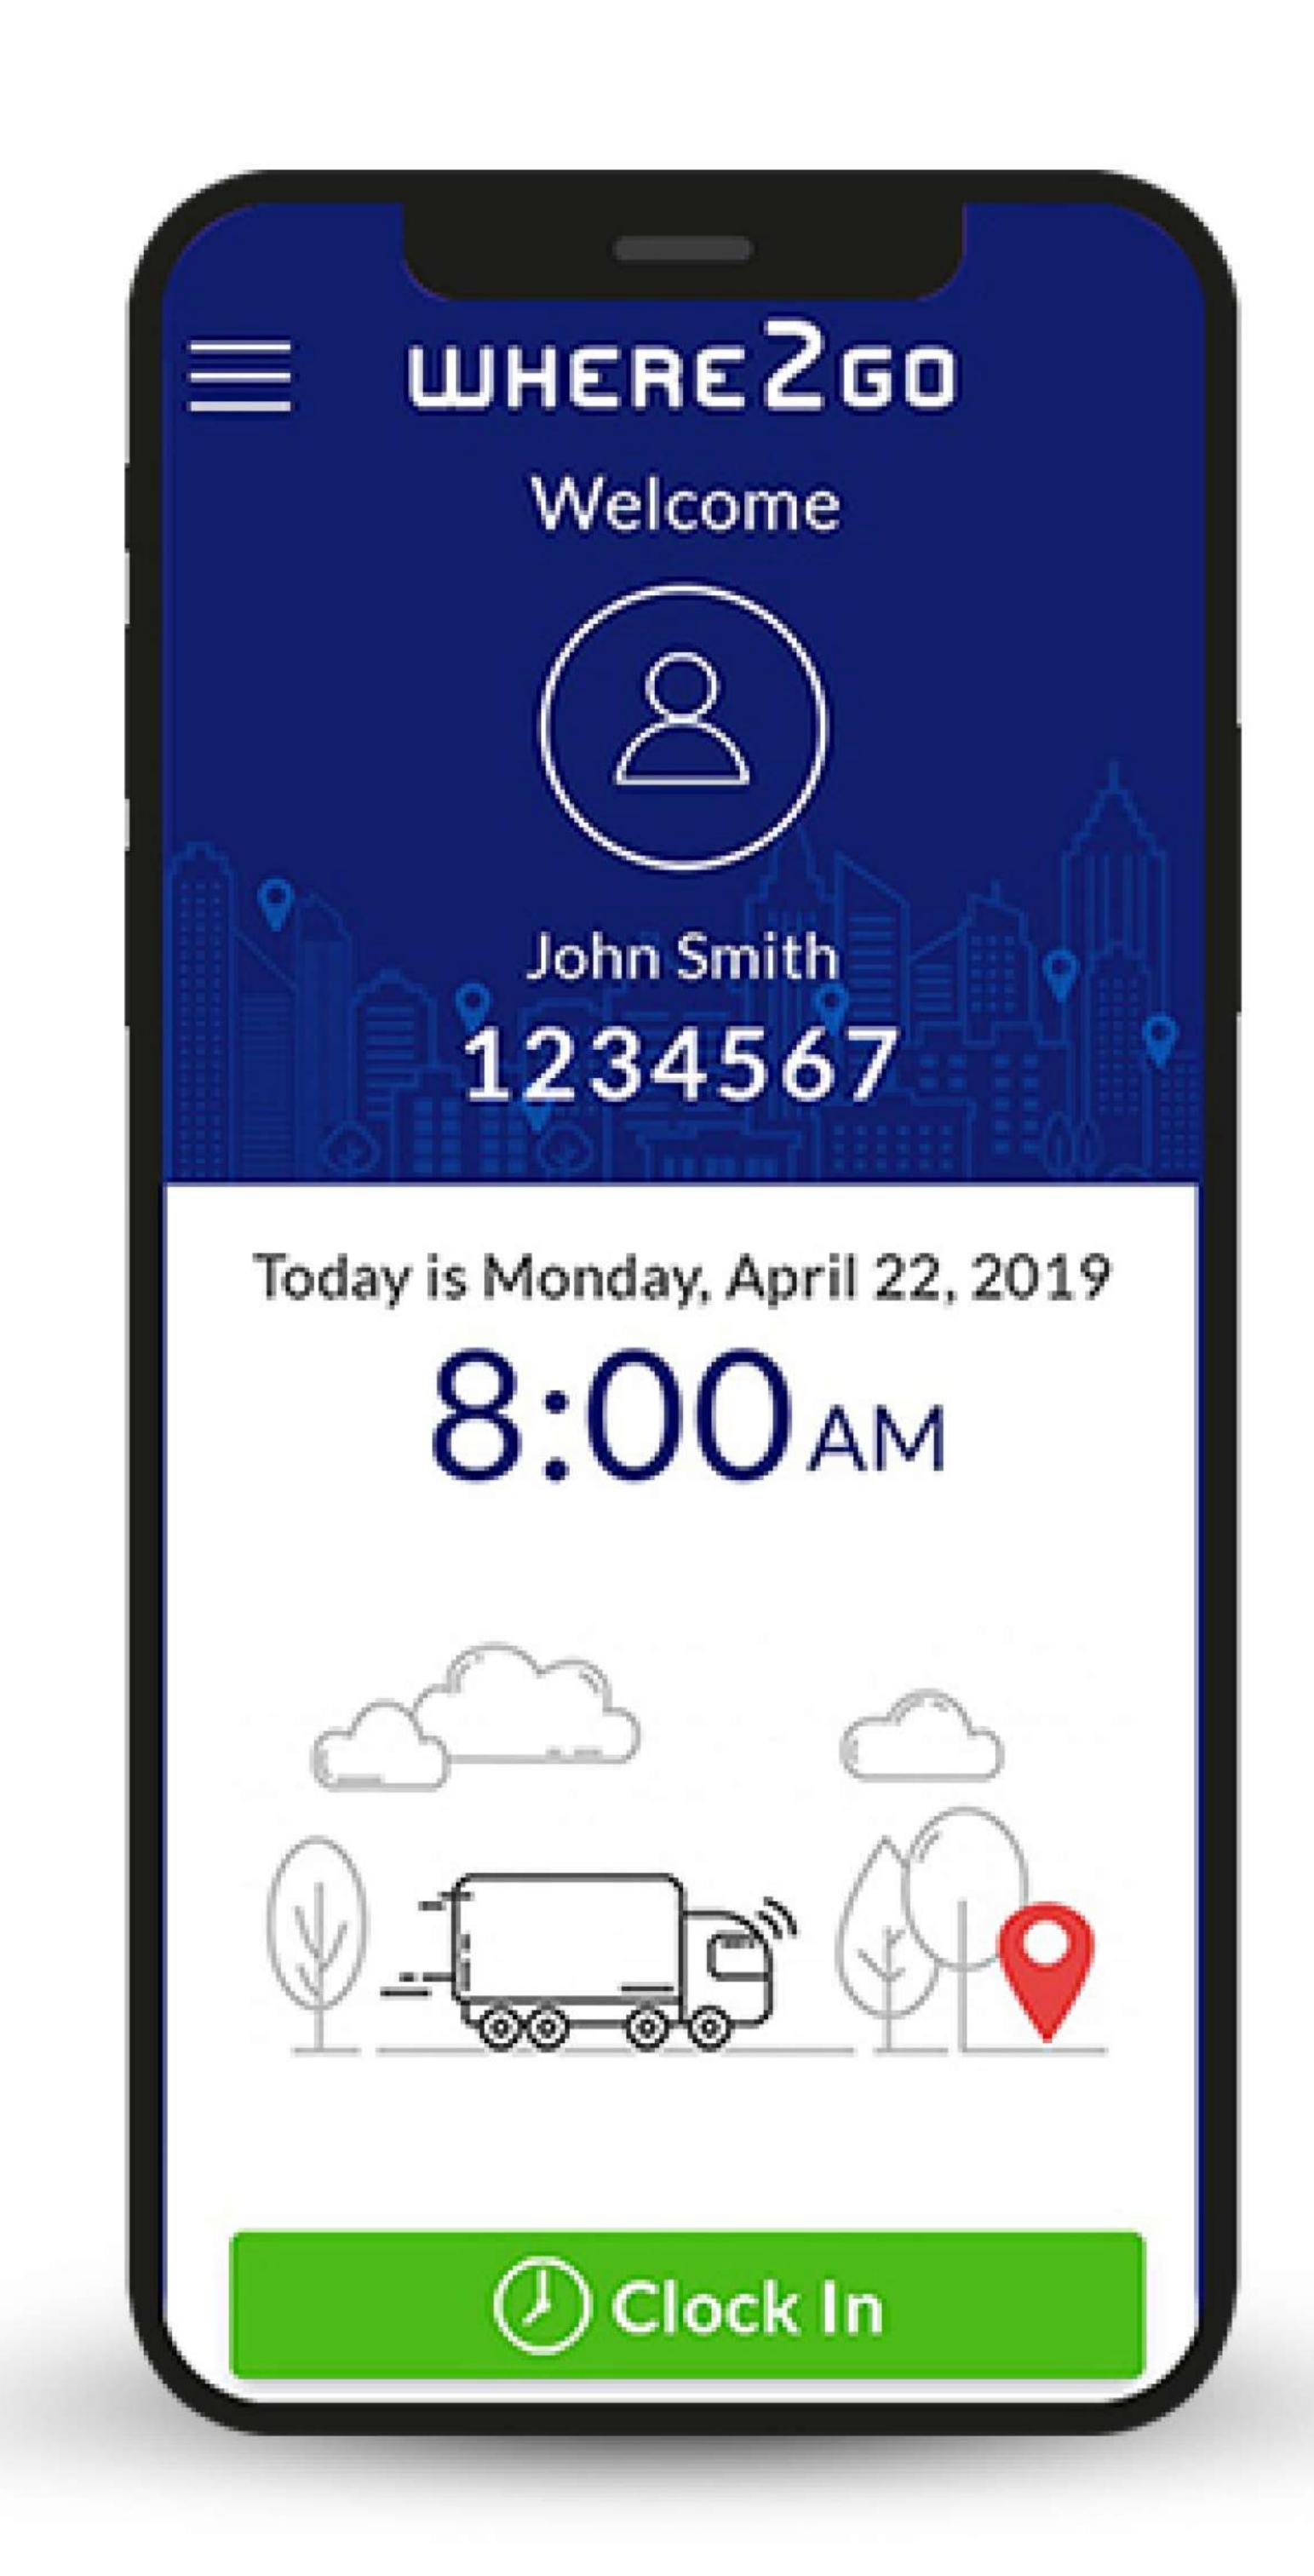

Developed a web portal and mobile app for a growing SaaS-based digital platform, Mobility SQR, and empowered their employees to raise travel requests for corporate purposes and get real-time notifications about their raised tickets. Leveraging Google's UI toolkit, Flutter, for building a beautiful and natively combined application for web, desktop, and mobile from a single codebase and implemented business workflows like tax laws prevalent in a country to which the employee belongs.

O High-Level Features:

- It helps mobility teams across the world to do their work better, faster and in a legally compliant manner.
- Offering products to automate and integrate various Global Mobility processes and provide end to end solutions on a common platform.
- Primary Interfaces: Web Portal, Mobile App (Android/iOS)
- Technology Stack:
 - Mobile App: Flutter
 - 3rd Party Integration: Linode Cloud
- Backend: Python (Django), Angular, SQL Server
- Server Environment: Microsoft Azure

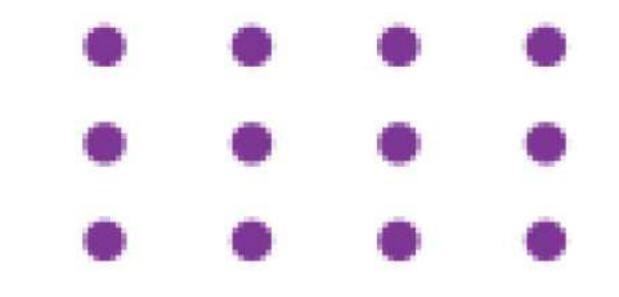

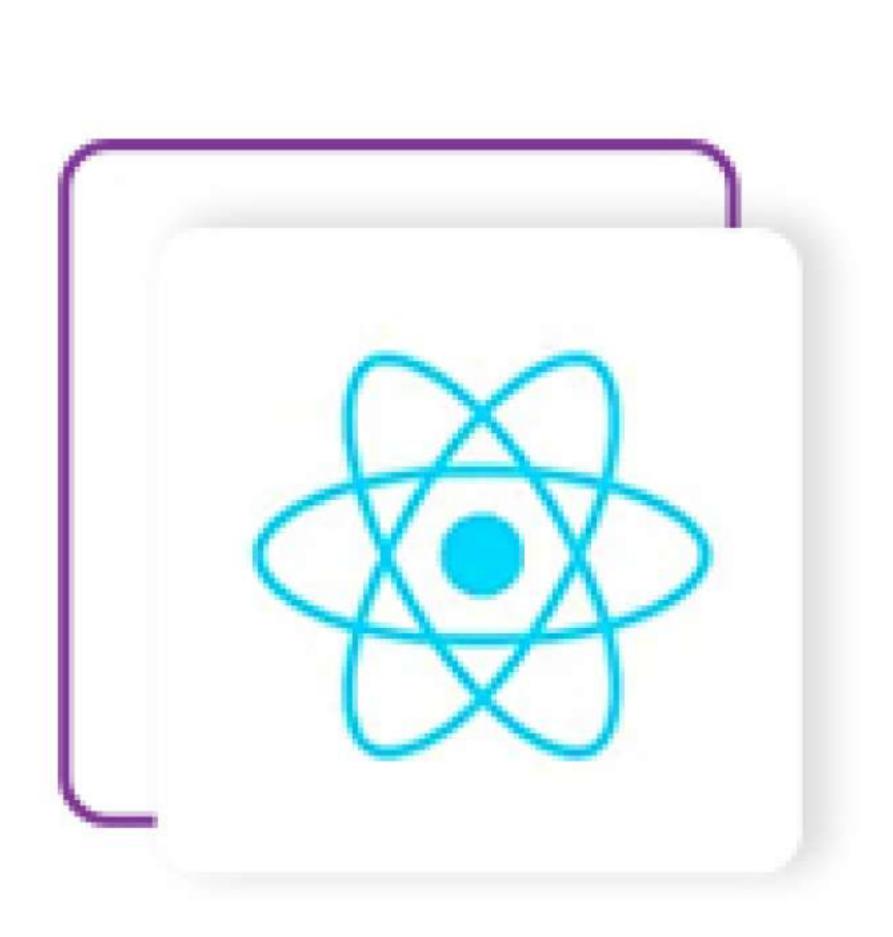

UI/UX Design

We design a state-of-the-art and high-quality
mobile application that is able to meet
your business objectives. As a Custom
mobile app development, we work closely
with our developers to ensure that our designs
ar technically feasible and user-friendly.

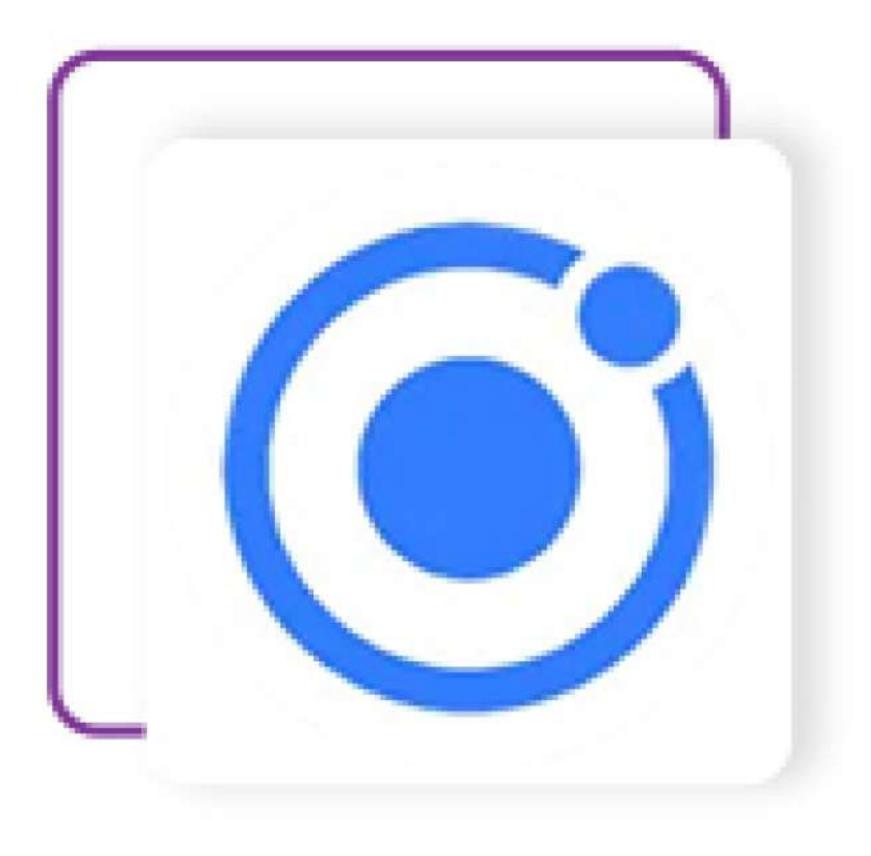

Cross-Platform Apps

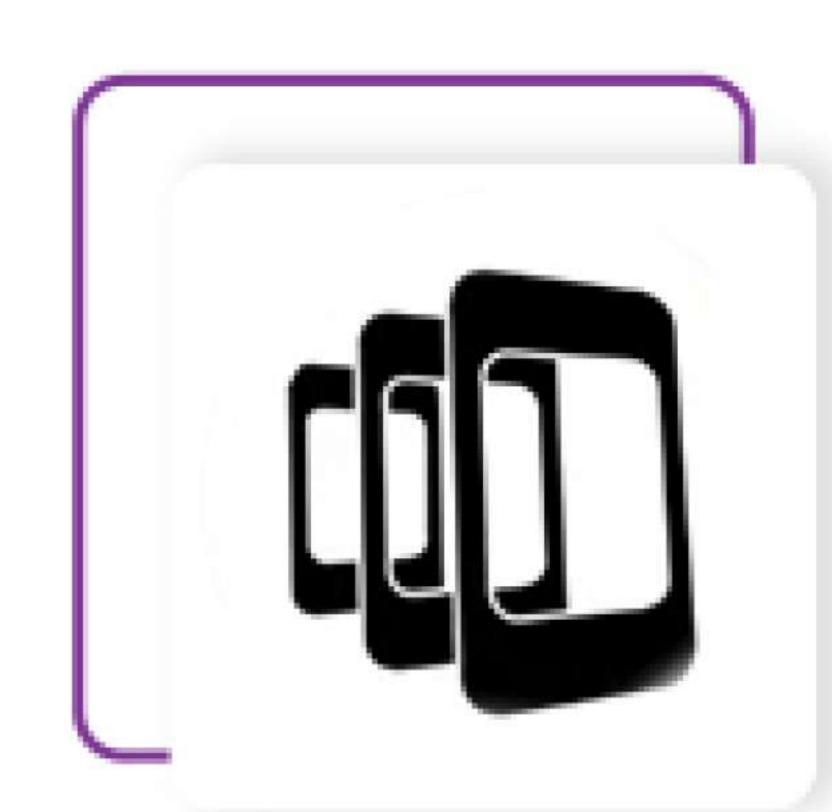

If you want to build a uniform solution that runs across various platforms, then you are at the right place. We have a team of the finest developers who are experienced in developing cross-platform apps that can help your app scale new heights

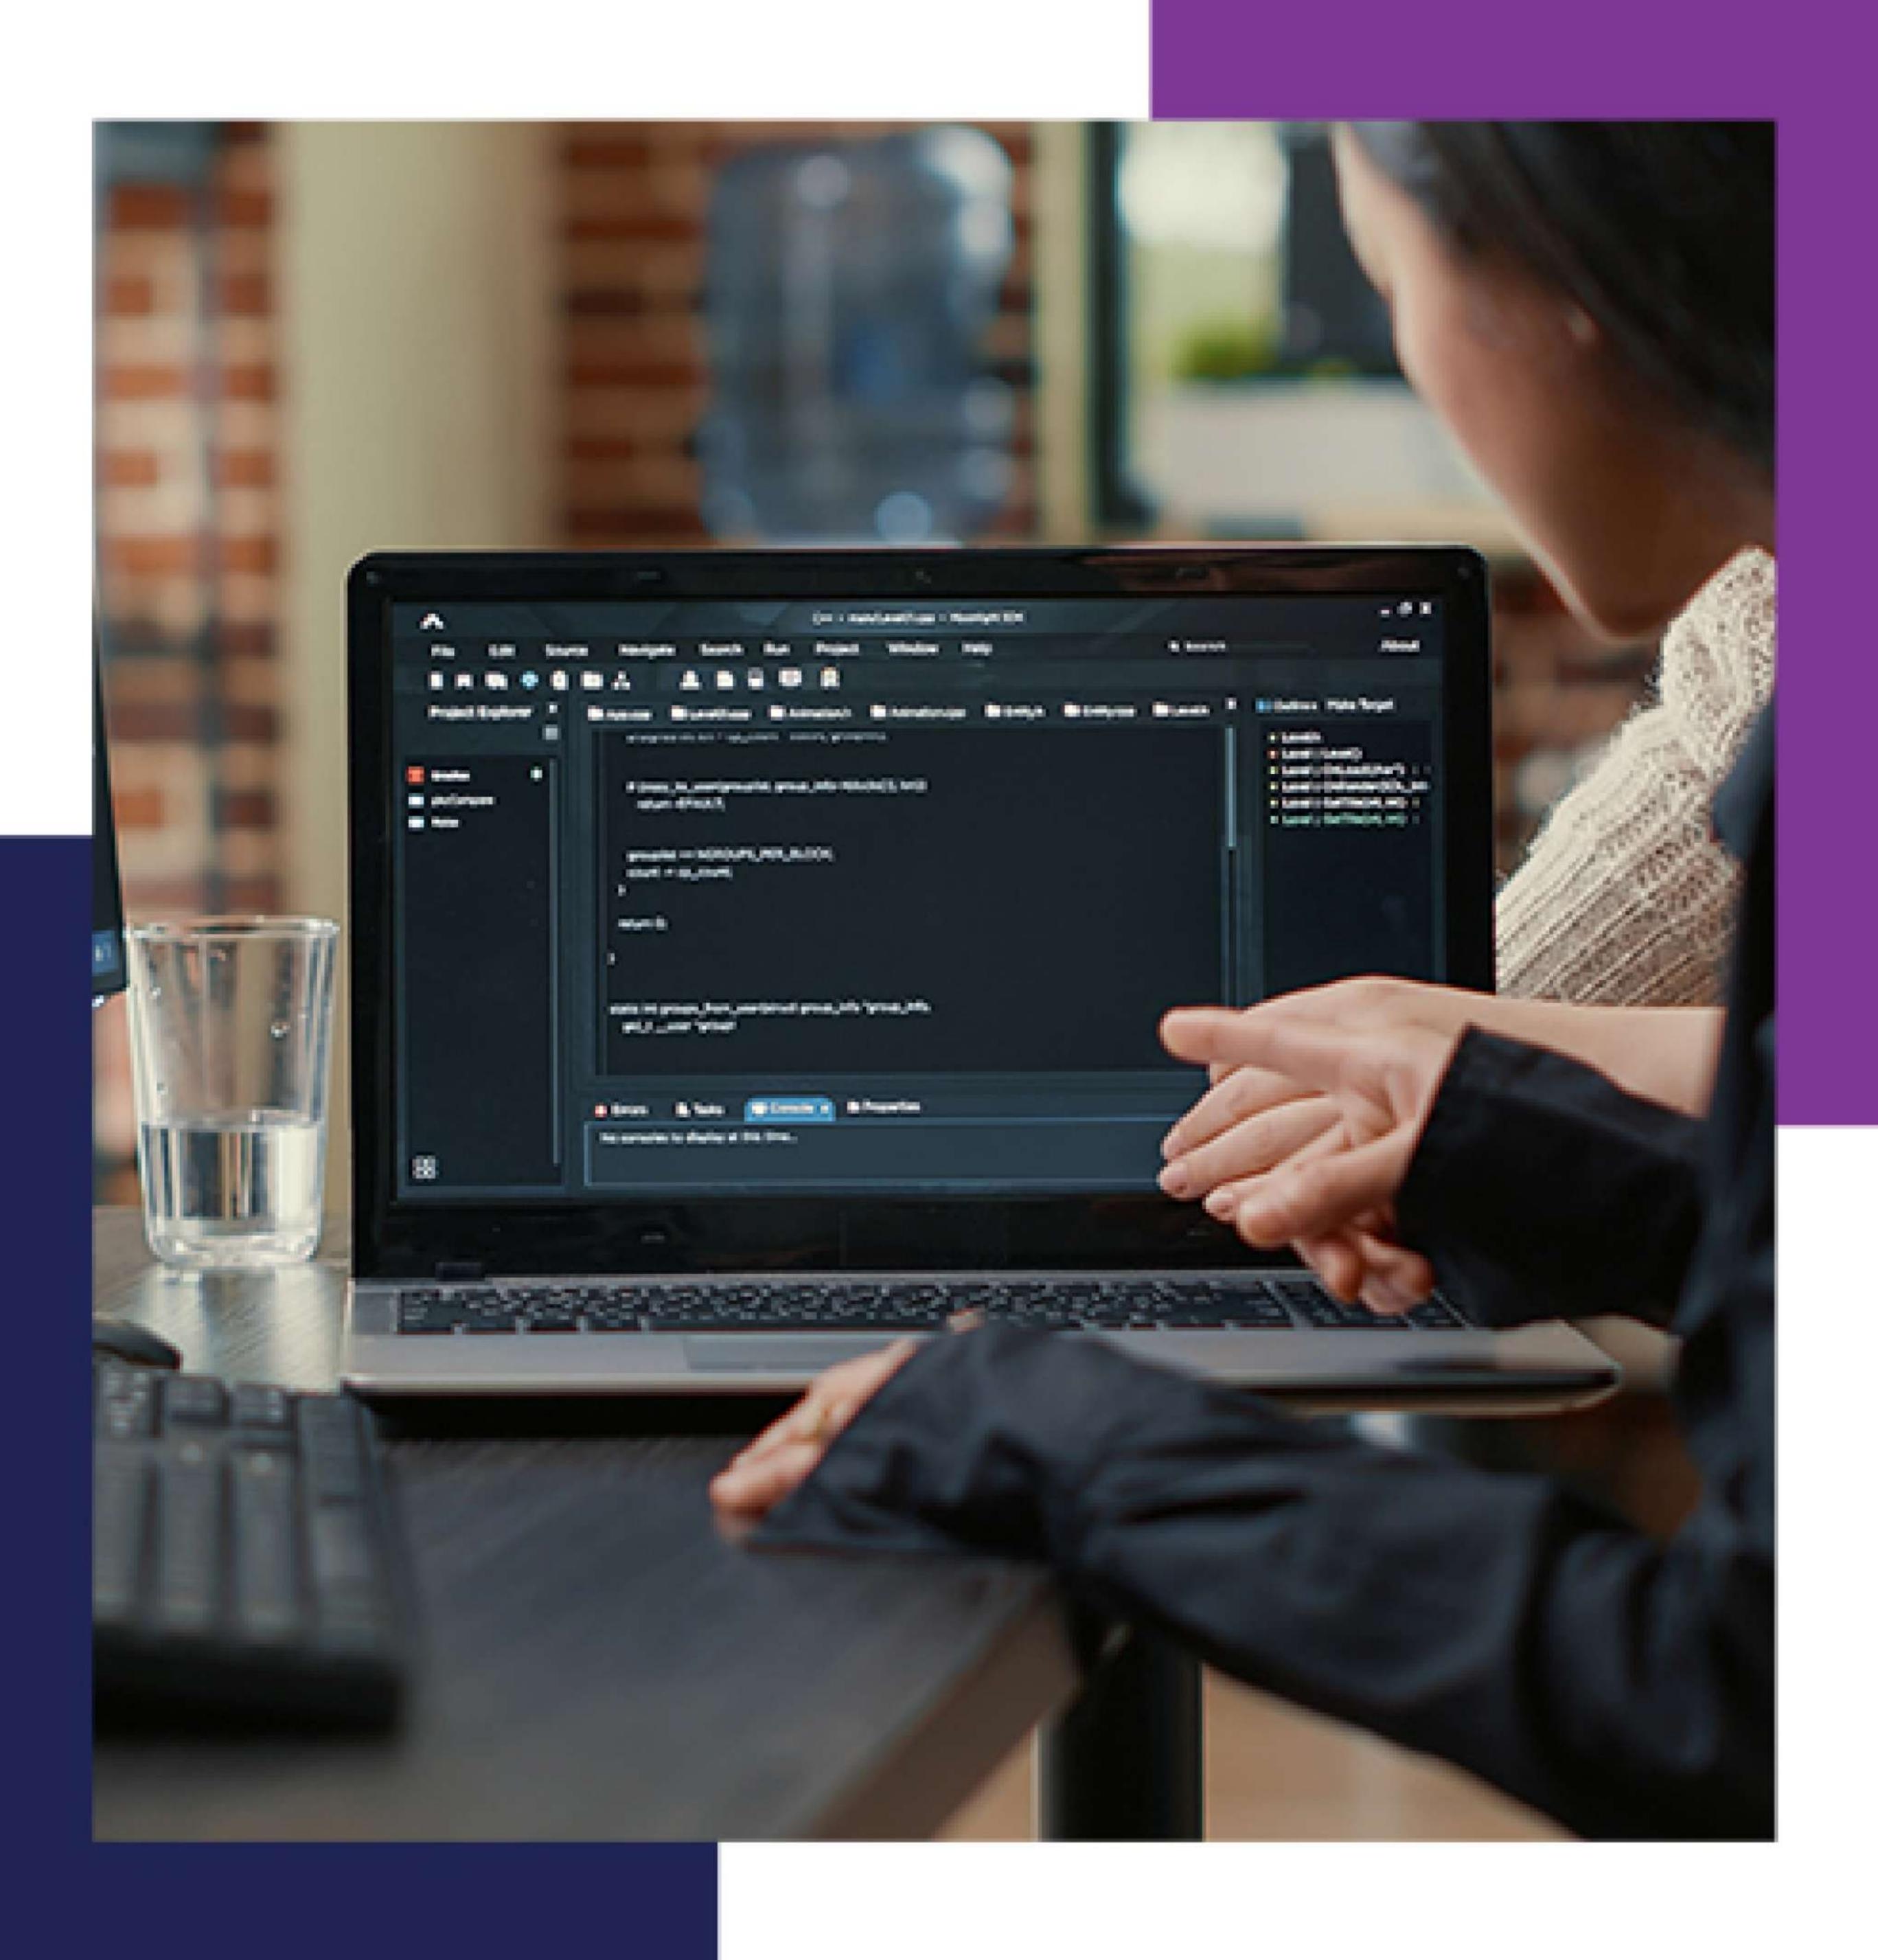

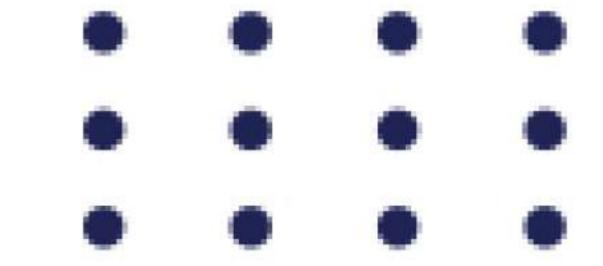

App Testing

Our team not only brings you a polished, one-of-a-kind mobile application but also validates it by testing the app with real users on real devices. Quality assurance is a must for us, and we strive to deliver a flawless app.

App Maintenance and Support

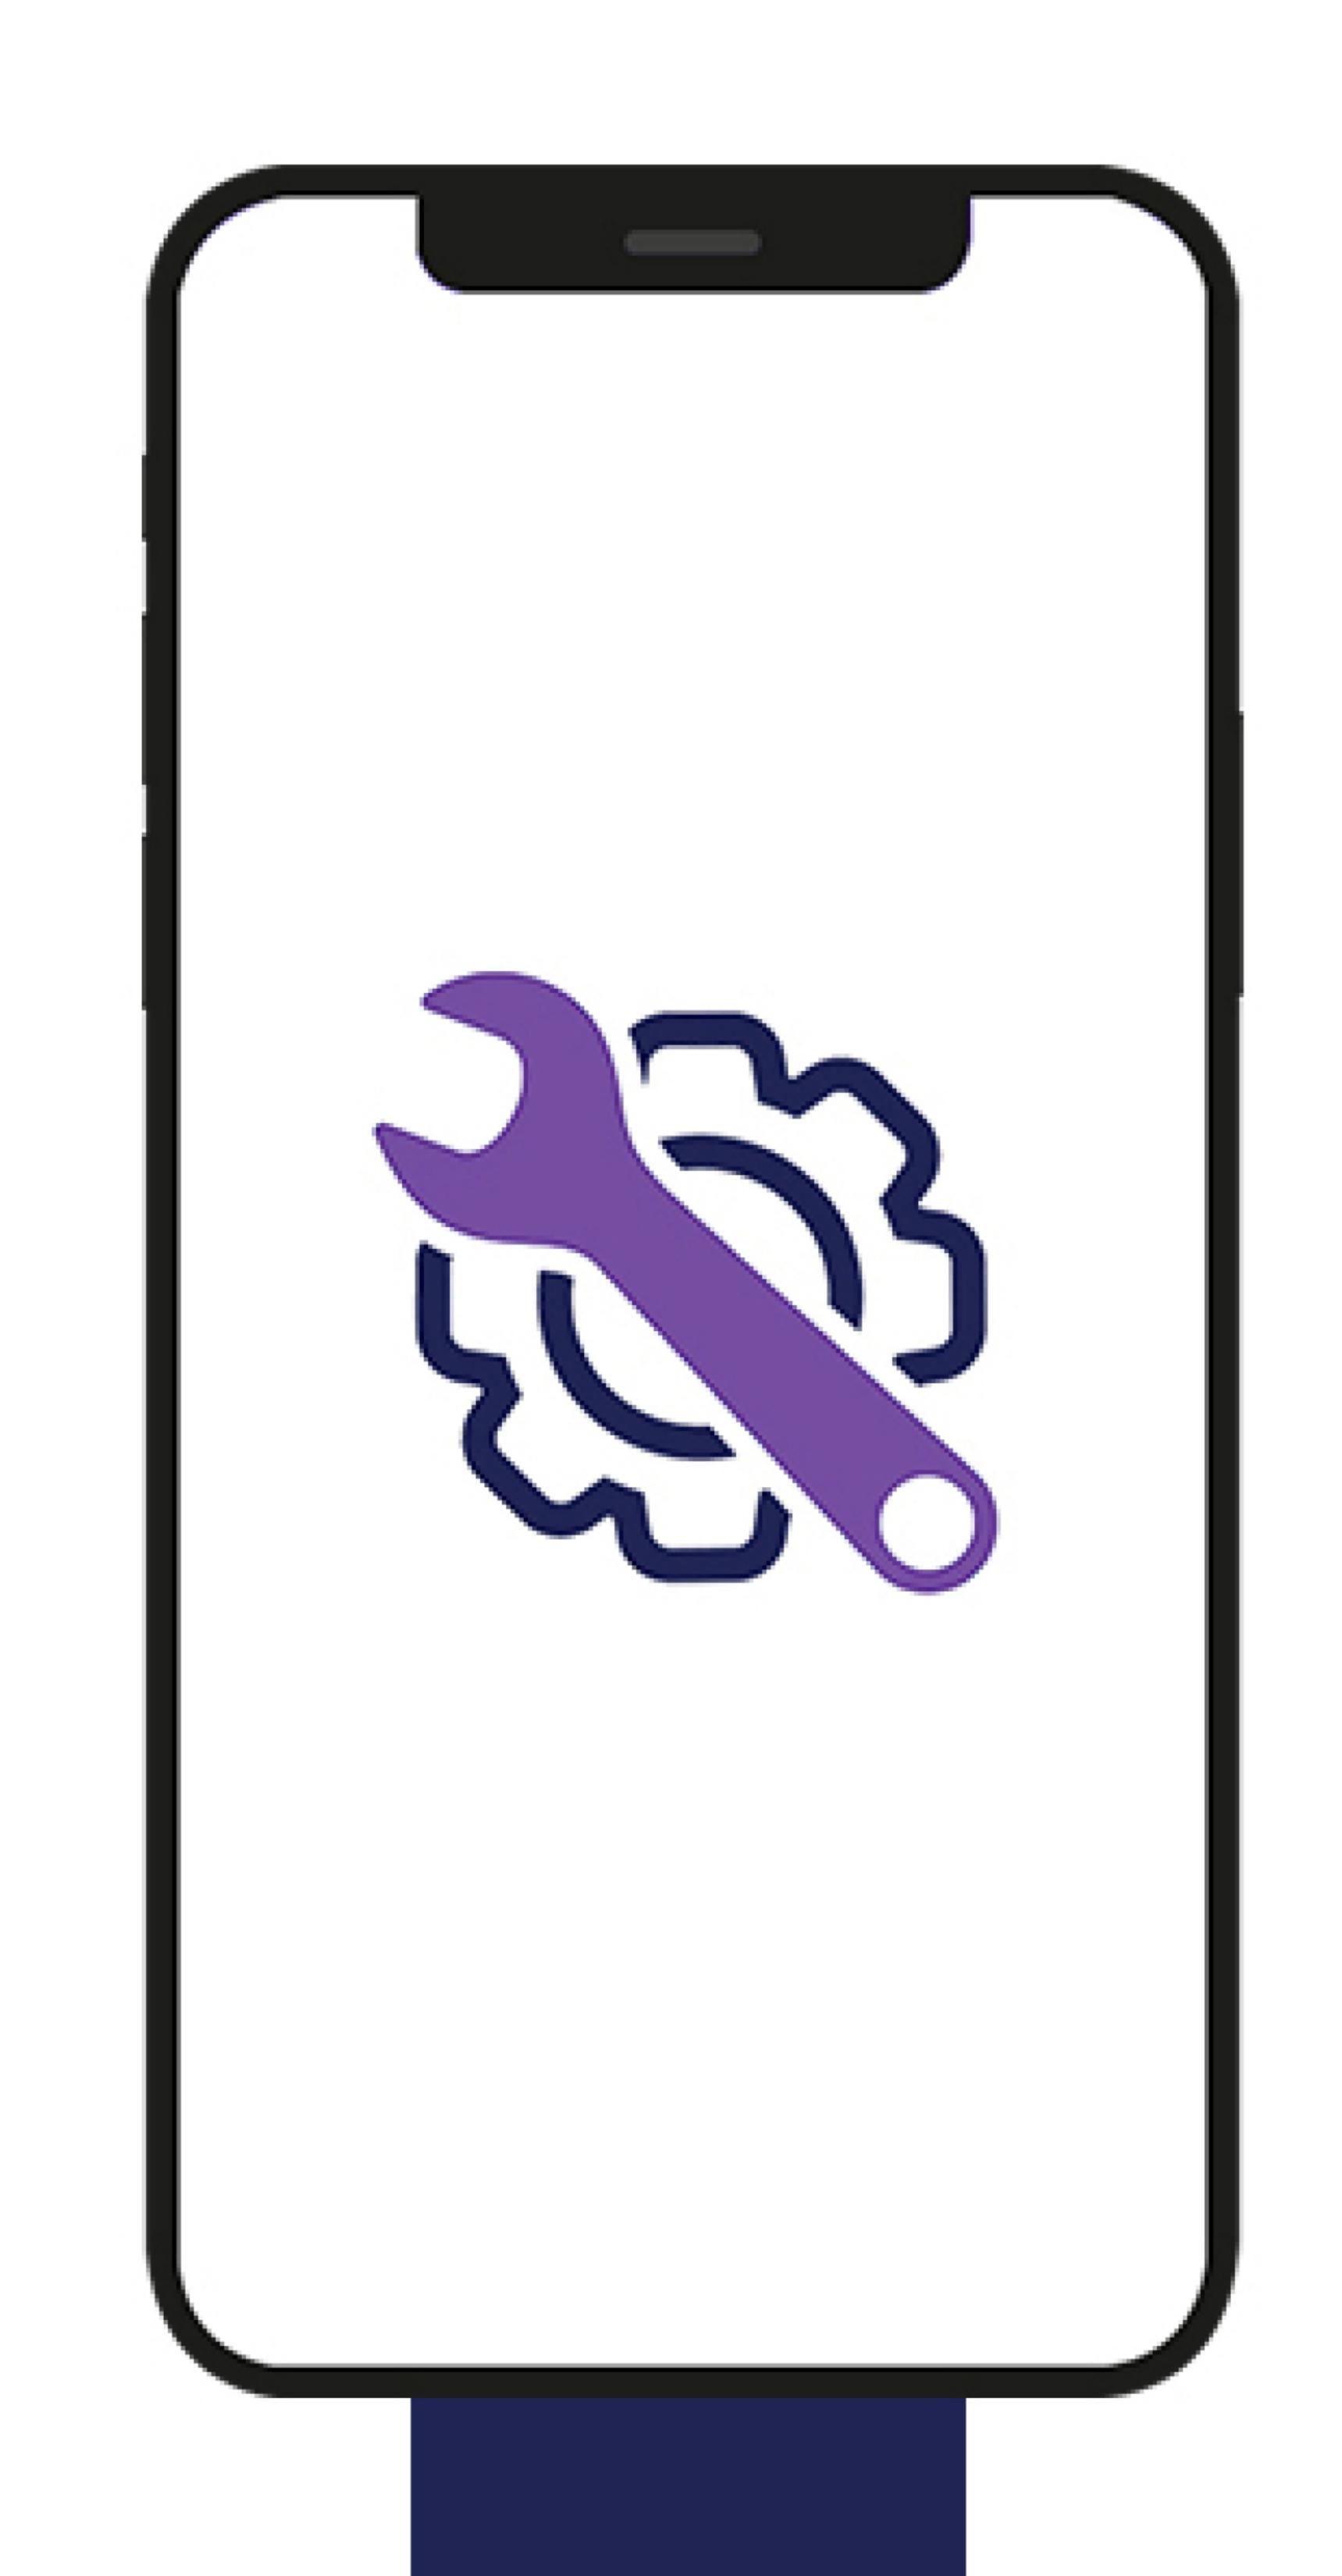

Along with creating a secure and robust application, our team also offers a wide range of maintenance services, including feature updates, bug fixes and performance optimization. Keeping your app needs a top priority, we ensure long-term success for your business.

Custom Strategy

We understand that every business is different and needs a unique blueprint to succeed in the ever-changing virtual landscape.

We don't just copy and paste the same strategy in every business. Instead, we study your company, consult you on what you need and then curate a plan of action only for you.

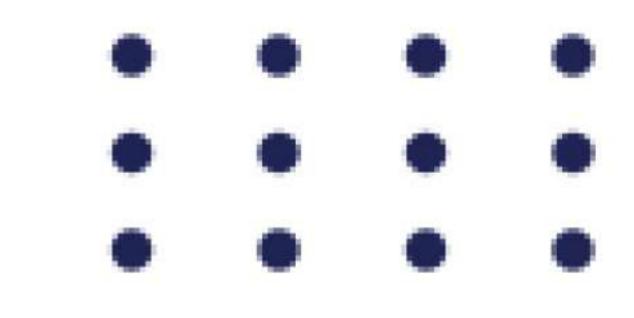

Every Step, Mapped

Tracking performance is essential.

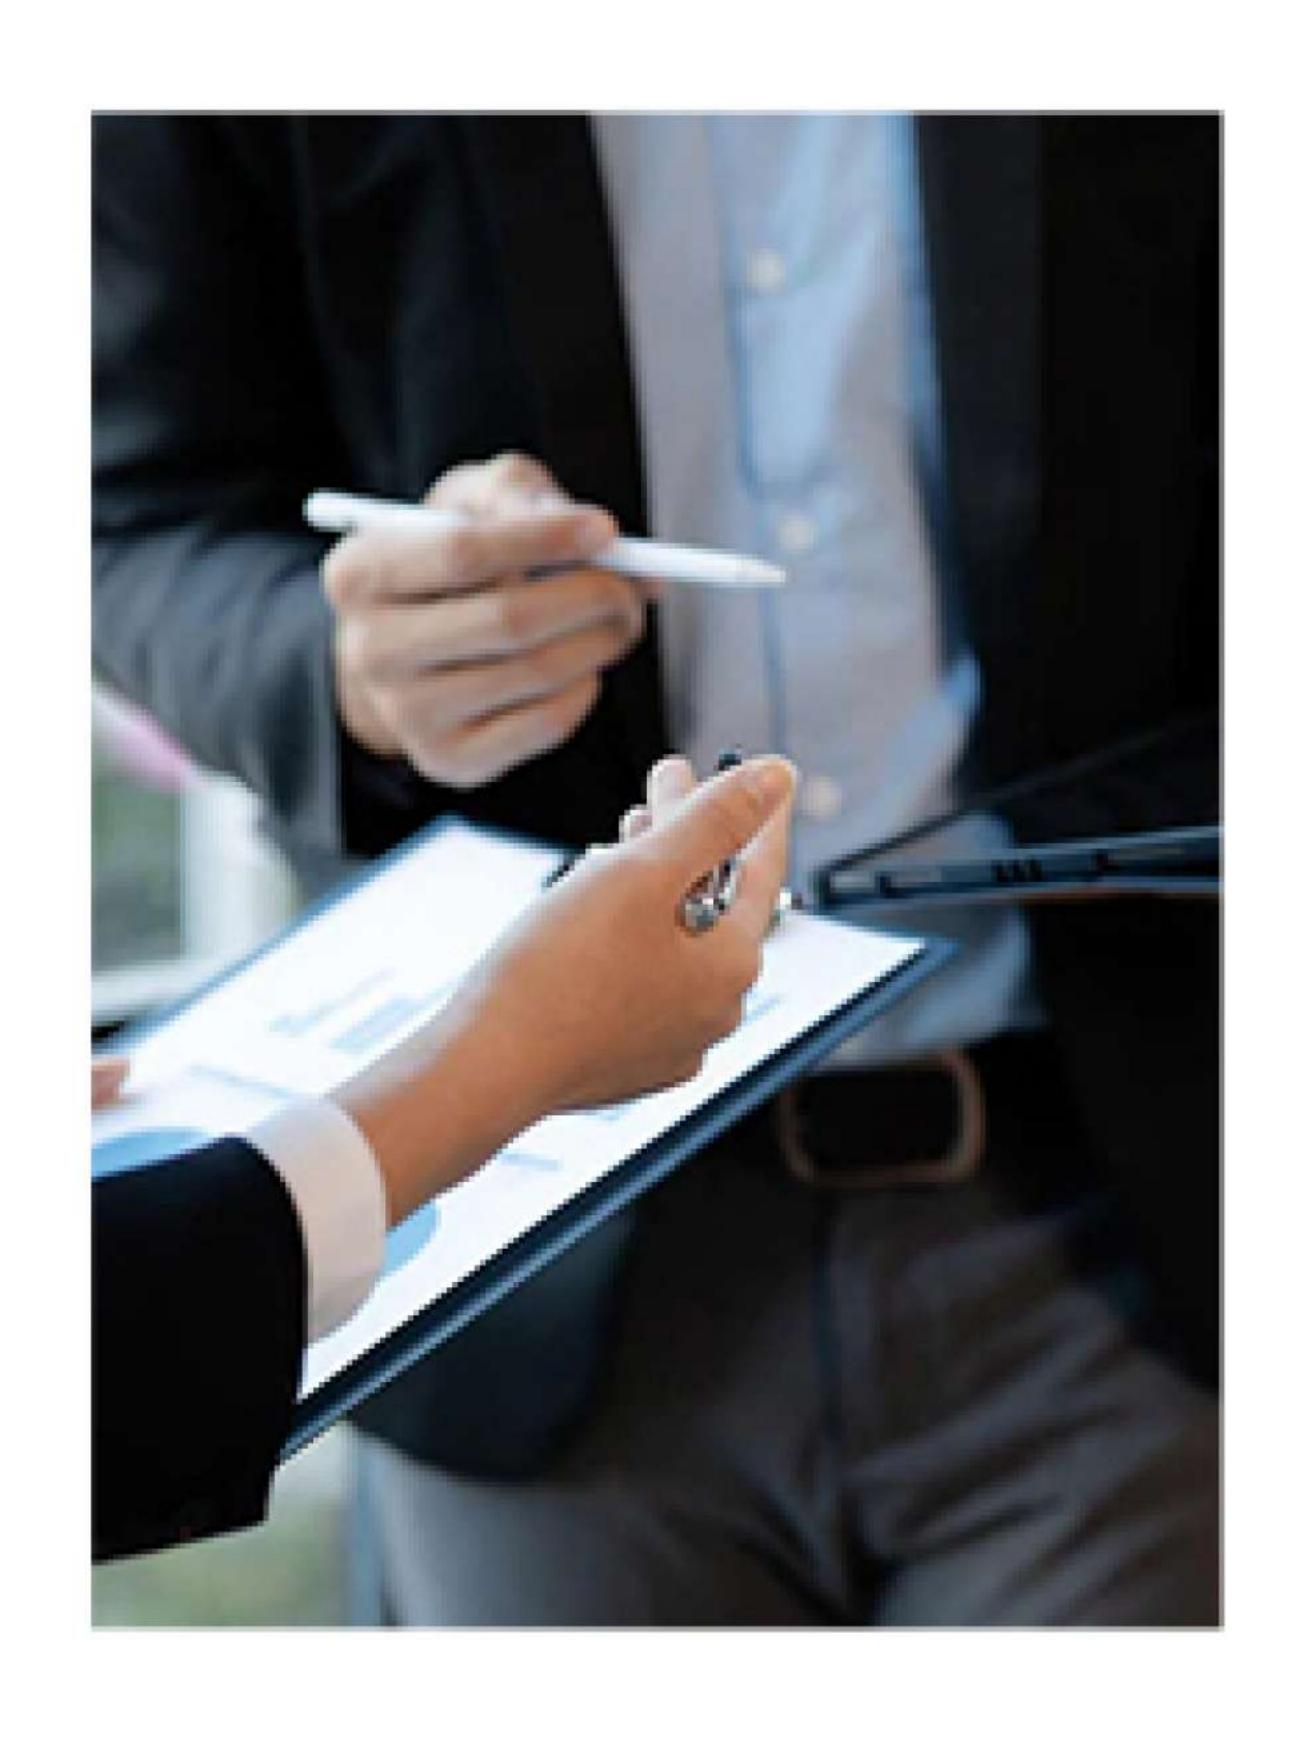

We ensure that you get customized reports for each team member involved so that you can be a better judge of your own progress. You get month-by-month reports of how your brand is getting closer to the top every day. Don't worry; we have all your growth data in one place

Turning challenges into revenue

Every company has its fair share of challenges, but we don't see them as threats. Instead, we see them as revenue-generating opportunities. With their years of experience, our analysts review your company's challenges and combine relevant practices to provide the best solutions. We take pride in ourselves for pushing the boundaries
